EDUCATION

MSc Advanced Computing

[09/2025 – Current day]

King's College London

- Thesis: *Vision Transformer-based Autonomous Navigation for Off-road Environments*

BSc Computer Science

[09/2022 – 07/2025]

University of Westminster

- Graduated with First Class Honours (85%)
- Thesis: EdibleEducation – An online platform to share culinary knowledge and know-how

Advanced IT

[09/2018 – 06/2022]

Arpad Vezer High School, Hungary

WORK HISTORY

Student as Researcher

[05/2025 – 12/2025]

University of Westminster

- Aim: To develop a framework for an interactive platform that enables elderly people to access, understand, and interact with complicated health-related digital content
- Completed 5 different Natural Language Processing courses as part of this project
- Collaborated closely with academic staff
- Conducted extensive literature reviews, enhancing the overall knowledge base. (30+ papers)
- Produced highly detailed documentation to compare the performance of 4 different NLP tools on health-related documentation

Students Helper for Matchmaking Program

[12/2024 – 03/2025]

University of Westminster

- This project aimed to develop a matchmaking platform that connects University of Westminster (UoW) students with research opportunities
- Co-designed and developed a React frontend for a matchmaking platform connecting students with academic staff
- Supported the creation and managed a survey to collect participant profiles and research focus areas
- Successfully matched over 180 participants into interdisciplinary teams, facilitating new project opportunities

- Adapted project delivery after management failure from a digital platform to manual matching, ensuring project goals are still achieved

WordPress Webmasters / Content Coordinator

[01/2025]

- Innovo-Patak Sárospataki Városfejlesztő Nonprofit Kft <https://zoldutazas.com>
- Improved workflow efficiency by focusing on content reusability
- Developed new content to enhance site scalability and facilitate future editing

SKILLS

- **Languages:** JavaScript (3 years), TypeScript, Python (over 3 years), Java (2 years), C
- **Frontend:** React, HTML5, CSS3
- **Backend:** Node.js, Express, Django
- **Databases:** SQLite, MongoDB
- **Tools:** Git, Netlify, Bootstrap, Matlab
- **Others:** MERN stack, machine learning principles, CNNs, NLP

PROJECTS

EdibleEducation

[09/2024 – 05/2025]

Final Year Project – University of Westminster

- The project aimed to create a platform to promote home cooking, knowledge sharing and foster collaborative home cooking with the objective of promoting a healthier lifestyle, sustainable habits and cross-cultural exchanges
- Accomplished First Class (84%) mark and nominated for Final Year Project Awards

SETS-Project Team Member (to be published)

[03/2024 – 04/2024]

University of Westminster

- SETS aims to facilitate a more nuanced and scalable evaluation of Text Summarisation techniques, paving the way for advancements in the field
- Collected and analysed over 300 research papers from 6 established databases
- Identified different Text Summarisation methods and metrics research papers

Student as Co-Creators Project (CODEMATICS)

[02/2023 – 07/2023]

University of Westminster

- Collaborated with fellow students and academic staff to bridge the gap between level 4 Mathematics and Programming
- Organised and managed a workshop for students and academics (40+ attendees)
- Gathered and analysed surveys from the workshop and developed an Ontology

CERTIFICATES

Natural Language Processing Specialisation – DeepLearning.AI

[10/2025]

NLP - Natural Language Processing with Python – Udemy

[08/2025]
